About Oro Verde Limited: Oro Verde Ltd is a mineral exploration company focused on identifying and developing significant gold projects in Central America, particularly Nicaragua. Oro Verde holds an Option to Purchase Agreement to acquire 100% of the Topacio Gold Project in Nicaragua that contains a NI43-101 compliant Inferred Mineral Resource of 340,000 ounces of gold. A US$7.9 million 5 year farm-in agreement was signed on November 25, 2015 with a subsidiary of global gold major - Newcrest Mining Limited (ASX: NCM) – to jointly explore for multi-million ounce gold deposits at Topacio. Oro Verde also holds 100% of the early stage San Isidro Gold Project, also in Nicaragua, located adjacent to the 2.3 million ounce La India gold project.

1. The information in this document that relates to Foreign Mineral Resource Estimates is extracted from the report entitled “High Grade Gold Project Acquired” created on 11 November 2014 and available to view on www.asx.com. The Company confirms that it is not in possession of any new information or data relating to the foreign estimates that materially impacts on the reliability of the estimates or the Company’s ability to verify them as mineral resources in accordance with the JORC Code. The information included in the original market announcement continues to apply and has not materially changed. This is a foreign estimate and is not reported in accordance with the JORC Code. A Competent Person has not done sufficient work to classify the estimate as mineral resource in accordance with the JORC Code. It is uncertain that following evaluation and further exploration work that the estimates will be able to be reported as mineral resources in accordance with the JORC Code.

2. The information in this document that relates to Exploration Results is extracted from the following reports: “Expanded Gold Resource Potential” created on 9 November 2015 “New Gold Targets Identified at Topacio” created on 2 May 2016 and “Drilling of Rebeca Zone Planned – Gold Potential Enhanced by Infill Soils Results” created on 7 December 2016; all completed under Mr Trevor Woolfe as Competent Person and available to view on www.asx.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

Topacio Gold Project
- 2016… Target generation

Objective To Outline >2 Moz Gold Resource

• **Stage 1a** - (Year 1 - 2016) investigate potential of entire concession
  
  • **Geology:** detailed vein mapping and sampling
  
  • **Geochemistry:** concession-wide grid soil sampling (multi-element)
  
  • **Geophysics:** airborne magnetics and radiometrics
  
  • **Drill target generation**

• **Stage 1b** – (to Aug 2017) Rebeca Vein selected as the high priority drill target
Soil Geochemistry – Gold + Arsenic + Antimony + Tungsten

Characteristic of the upper levels of a buried low sulphidation epithermal gold system

Refer to ASX announcement dated 7 December 2016 “Drilling of Rebeca Zone Planned – Gold Potential Enhanced by Infill Soils Results”
Topacio – Drilling Program

Phase 1 Drill program

- Rebeca Vein
- Completed this week
- 7 Diamond Drill Holes
- Total = 1,767m
- Assay results pending
